

Yogesh Gupta - Senior Security Architect - Cloud & Digital and Trainer

Yogesh is a Cloud Security Alliance Authorized Instructor for delivering CCSK and CCSK Plus courses.

He is a cloud security architect presently based out of Dubai, UAE. He has 17 years of cumulative and global experience in infrastructure, information and cloud security.

After having worked in Corporates in his early career, he has established a successful cyber security firm in Bangalore, India in the year 2011 and worked with multiple clients across India, Middle-East, Africa, US and Australia.

Over the past years he has specialized in various cloud domains - IaaS, PaaS, DevSecOps, Container Security and worked on CSP platforms – Microsoft Azure & AWS. His InfoSec experience had provided an understanding of the digital risks and security controls and the desire to design more custom security solutions.

His current work area includes security assessment of cloud infrastructures and designing cloud security solutions. He holds CISSP, CCSP, CCSK, AWS architect and various other vendor certificates. His current area of interest are Zero Trust Architecture and DevSecOps.

Yogesh is a regular writer / blogger on various cloud security subjects at Peerlyst Forum.
